

# DISCORD RULES

---

Thanks for joining Magik Media. Your one stop shop for everything IPTV related.

1.

By now you will have received a separate PDF file which has your subscription details. Please keep this PDF safe. At Magik Media we adopt a “Stability Over Quality” policy.

This means we pride ourselves on providing extremely stable services, but do not claim to provide every channel in UHD or 4K.

---

2.

This Discord group is private – do not give out invite links to this group under any circumstances. Doing so will result in an instant ban.

For referrals, please check the #inviting-people-here channel.

---

3.

Treat others here as you would like to be treated.

If you like being treated like a dick, you’re not welcome here.

---

4.

You are aware that crypto is the only payment method we accept.

From time to time, we may accept alternative payment methods, but these should not be expected or considered standard.

By joining this Discord, you agree that you will either be willing to pay in crypto at the time of your subscription renewal or will seek advice from an admin here well in advance of your renewal date if you’re unsure how to pay using crypto, so we can assist you.

Note: if your response to this is “I don’t do crypto,” please do not agree to these rules.

---

**5.**

Mentioning any other IPTV supplier, whether in public channels or via PM to any member of this community, is strictly forbidden.

---

**6.**

Poaching of members is forbidden and will result in you being banned and your services terminated.

---

**7.**

Sharing of accounts is not permitted. Our software will detect and ban shared accounts, and they will not be reinstated.

---

**8.**

If your line gets leaked, your line gets banned – zero tolerance.

---

**9.**

If you break the rules, all of your lines will be suspended or terminated – not just the one tied to the rule you broke.

---

**10.**

BE NICE!!!!

---

# APPS

We DO NOT allow third party apps on any of our services, nor do we release DNS details for any service.

We either provide an individual app for each of our services, or our own version of the very popular Tivimate app which has all services built in.

Lines will be instantly banned if we find out you are not using an authorised app.

# VPN

We do not enforce the need for a VPN here but we strongly suggest and advise that you do use one for your own protection. Also many ISP's are now invoking blocks and a good VPN is one way to resolve your service being blocked. Magik Media can supply a 6 connection, zero log VPN for a very reasonable price, or you can use a VPN of your choice.

Please DO NOT use a free VPN.

# VOD

We supply a small amount of free VOD with all live TV channels. It is supplied at no extra cost, and as such is supplied on an "if it works it works" basis.

We do not take requests on the free VOD tiers and they are updated as and when.

They usually dont have cinema releases either.

Our EMBY service is the one to go for if you are into your movies on demand. It has over 80,000 movies and 400,000 TV episodes. Its updates constantly and includes all cinema releases. You can also request content on it as well.

It is a standalone app and is currently £50 per 12m.
